Mrinal Lobo

DevOps Engineer

Bangalore, India | +91-91080-60958 | mrinal6lobo@gmail.com | linkedin.com/in/mrinal-l-99a9451a4 | github.com/mrinallobo

Summary

DevOps Engineer with 4 years of experience building and running production Kubernetes platforms on Azure and AWS. Automates infrastructure with Terraform, GitOps and CI/CD, builds observability with Prometheus, Grafana and OpenTelemetry, and handles incident response. Certified Azure Administrator (AZ-104) and GitHub Actions (GH-200).

Technical Skills

Cloud: Azure (AKS, Key Vault), AWS (EKS, ECS, EC2, RDS, Lambda, S3, VPC, IAM, Bedrock), GCP (GKE)
Containers & Orchestration: Kubernetes, Docker, Helm, Flux, GitOps
IaC & CI/CD: Terraform, Ansible, GitHub Actions, Azure DevOps, HashiCorp Vault, Git
Observability: Prometheus, Grafana, OpenTelemetry, Loki, Alertmanager, Elastic Stack (ELK)
Languages & Data: Python, Bash, SQL, Linux, PostgreSQL, Kafka
AI & MLOps: Amazon Bedrock, RAG, vLLM, Ollama, MLflow, Kubeflow, scikit-learn, TensorFlow, Spark

Experience

EG A/S Aug 2023 – Present
DevOps Engineer *Mangalore, India*

- Built and operate a multi-tenant, highly available **AKS (Kubernetes)** platform for Estata, a rental management product: 8 nodes, ∼**60 .NET microservices** on Kafka, meeting a **99% monthly uptime SLA**.
- Ship continuously through **GitOps (Flux, Helm)** with rolling updates; built CI/CD with **GitHub Actions** and Azure DevOps, cutting build time from **30 to 5 minutes** by sharding jobs.
- Provisioned MainManager's AWS environments (EC2, ECS, RDS, S3, VPC) with reusable **Terraform** modules and Vault; cut cloud spend by **$4,000+/month** via containerization, auto-shutdown and rightsizing.
- Built observability with **OpenTelemetry, Prometheus, Grafana and Loki**, alerting to Teams via Alertmanager; handled **incident response** and postmortems, with Claude agents for root cause analysis.
- Designed **MestroBot**, a production data pipeline (Scrapy, Elastic Stack) collecting several GB/day of energy readings from ∼140 companies; in the AI CoE team, built RAG chatbots on **Amazon Bedrock** (AWS ECS).

Aphelion Labs Feb 2023 – Jul 2023
Python Engineer *Indore, India (Remote)*

- Built the backend of Woodle AI, an AI website builder: **Python microservices** on OpenAI GPT APIs.
- Ran its infrastructure: **Docker** containers on **AWS (ECS, EKS)**, deployed through GitHub Actions CI/CD.
- Built REST APIs (Swagger/OpenAPI) for a financial services backend.

Glowtouch Technologies Aug 2022 – Jan 2023
Graduate Engineer Trainee *Mangalore, India*

- Maintained and hardened on-premises **Linux** servers for domain-hosting platforms (firewalls, fail2ban, systemd).
- Built **GitHub Actions** pipelines to deploy across environments.
- Wrote **Python and Bash** services and automation for the domain-hosting backend.

Projects

Low-Latency Trading Infrastructure | *Terraform, AWS, Prometheus, Grafana, Loki* | GitHub

- Terraform-provisioned AWS host, placed by per-AZ latency tests and tuned at kernel and network level (CPU pinning, TCP), reaching 1–3 ms order fills, with Prometheus, Grafana and Loki monitoring p50/p95/p99 latency.

AI Market Research Platform | *Python, AI agents, DuckDB, LanceDB, Neo4j* | lumen.tradehook.click

- Self-hosted on a dedicated Hetzner server with Prometheus and Grafana: scans ∼4,500 stocks over 4.5M+ data points, with Hermes-orchestrated AI agents (MiniMax model) researching earnings calls and SEC filings.

GKE SRE Platform | *GCP, Terraform, Ansible, Helm, Vault* | GitHub

- Regional GKE cluster built with Terraform and configured with Ansible: Prometheus, Grafana, Alertmanager, HashiCorp Vault, Rook-Ceph storage and node autoscaling.

Education & Certifications

B.E. Electronics and Communication, AJ Institute of Engineering and Technology 2018 – 2022
Certifications: Microsoft Azure Administrator Associate (AZ-104), GitHub Actions (GH-200)
